## Bottle Side Guides

[www.SystemPlastSmartGuide.com](http://www.SystemPlastSmartGuide.com)

**Application:** Aluminum guide rail with insert is used to guide containers, especially PET, in applications such as air conveying. These offer an alternative to brush guides which may get contaminated and cause increased friction or can break and fall out.

Click here for related information.

**Rail Material:** Aluminum

**Insert Material:** Low friction Nolu®-SD, which combines low friction qualities of Nolu-S with static dissipating abilities.
